

# intrafood:16

**The market success of your food product is undeniably linked to taste. The right taste excites and connects people. As experienced flavour specialists, we know all about this. For over 150 years now, we have developed and manufactured flavours for the food industry with one goal in mind: to make your product taste like more!**

### **'Surprisingly Natural'; our theme for the Intrafood:16**

In response to the increasing demand for both natural declaration and new, exciting flavour combinations, we invite you for a tasting session at our stand. Choose your favourite topping – or several! – with a yoghurt flavoured ice cream. Enjoy and please ask us what it is we can support you with for your product.

The toppings we are presenting today have been developed in co-operation with Colac, a specialist in the area of toppings, dessert sauces and fruit preparations ([www.colac.be](http://www.colac.be)).

### **Taste that excites**

We are delighted to present our large portfolio of authentic and natural declaration flavours. Our specialists are constantly working to develop new flavours that appeal to consumer's taste and deliver great eating experiences. Please look at our 'Flavour of the Month Idea' or ask for a product presentation for your R&D and marketing teams. Better yet, we could offer you a tailor made inspiration session, specifically designed around your food products.

### **Do you need more information?**

Please see our website [www.buteressence.com](http://www.buteressence.com) or call us at +31 (0)75 631 44 11.
